PROFESSIONAL SUMMARY

Deep Learning Engineer and AI undergraduate with hands-on experience in CNN architectures, transfer learning, NLP, and end-to-end ML pipelines. HCIA-AI certified with industry training from Huawei, Cisco, Microsoft, HP, Sprints, NTI, and ITI. Skilled in building and optimizing deep learning models using Python, TensorFlow, PyTorch, and Scikit-learn. Seeking international internship opportunities in Deep Learning, AI Research, or Machine Learning Engineering.

EDUCATION

B.Sc. in Computer Science
Arab Academy for Science, Technology & Maritime Transport (AAST), Egypt
Expected Graduation: 2028

TECHNICAL SKILLS

Programming: Python, C++, JAVA, C

Machine Learning:
Supervised Learning, Classification, Regression, Transfer Learning, Model Optimization, Model Evaluation, Cross-Validation

Deep Learning Frameworks:
TensorFlow, PyTorch, Keras, CNN

Data Science & Analytics:
Data Cleaning, Data Aggregation, Data Anonymization, Feature Engineering, Exploratory Data Analysis (EDA)

Tools:
Scikit-learn, Pandas, NumPy, Jupyter Notebook, Google Colab, Cursor, Antigravity ,VS code

PROJECTS

Deep Learning Image Classification System

Technologies: Python, TensorFlow, PyTorch

- Designed and trained Convolutional Neural Networks (CNNs) for multi-class image classification tasks
- Applied transfer learning using pretrained models to improve performance and reduce training time
- Implemented data augmentation techniques to enhance model generalization
- Evaluated performance using accuracy, precision, recall, and confusion matrix analysis

---

AI-Powered Financial Chatbot (BCG – Forage Simulation)

Technologies: Python, NLP Concepts

- Developed a Generative AI-based chatbot prototype for financial service use cases
- Applied prompt engineering and responsible AI principles

MediAI – AI-Powered Skin Cancer Detection System

Technologies: Python, Deep Learning, DenseNet121, Computer Vision

• Built a DenseNet121-based model trained on 10K+ dermoscopic images for early skin cancer detection.

• Implemented real-time benign/malignant lesion classification with confidence scoring.

• Applied ABCDE melanoma criteria to enhance diagnostic insight and model reliability.

TRAINING

Sprints x Microsoft

AI & Data Science Program | 2025

- Completed comprehensive training in AI, data cleaning, and data visualization techniques
- Built and evaluated Machine Learning models using structured datasets
- Developed practical ML projects demonstrating end-to-end data preprocessing, modeling, and performance optimization

HCIA-AI V4.0 – Huawei ICT Academy | 2026

Artificial Intelligence Training Program – National Telecommunication Institute (NTI)

- Completed intensive AI and ML training focused on industry-ready applications
- Applied machine learning models on structured datasets
- Practiced model evaluation and optimization techniques

Machine Learning for Data Analysis | 2025
ML– National Telecommunication Institute (NTI)

• Completed comprehensive training in Data Science, Data Analysis, and Machine Learning methodologies
• Developed Machine Learning and Deep Learning projects, including Natural Language Processing (NLP) applications
• Applied data preprocessing, feature engineering, model evaluation, and performance optimization techniques

---

CERTIFICATIONS

- HCIA-AI V4.0 – Huawei ICT Academy (2026)
- NTI Machine Learning for Data Analysis
- Data Science Essentials with Python – Cisco Networking Academy
- Practical Machine Learning for Data Scientists – ITI & MaharaTech
- Sprints x Microsoft Summer Camp – AI & Machine Learning

ADDITIONAL INFORMATION

Soft Skills: Analytical Thinking, Problem Solving, Research Mindset, Team Collaboration, Technical Presentation . Public Speaking
